# Create market ready IoT & AI solutions

**IoT-TICKET®**

IoT-TICKET® is the most complete, modern and easy to use Internet of Things application and innovation platform.

Designed for creating and managing IoT and AI applications from specific use cases to massive scale solutions without a single line of code.

## Our promise

- **20%** productivity gain

- **60 times** faster development

- **4 times** more cost effective

### TURN YOUR IDEAS INTO APPLICATIONS IN MINUTES
Significantly improve time-to-market

- Anyone can create massive scale, analytics enabled IoT solutions
- Resulting in major cost savings and faster time-to-market
- No heavy R&D, infrastacture and project managment costs
- Minimise risks with market proof and award winning solution

### DRIVE YOUR DIGITAL TRANSFORMATION
Big-data into meaningful business outcomes

- Concentrate on business development instead of software
- Turn your employees into solution designers to drive innovations
- Increase revenue by building new business models
- Improve processes, save costs and increase safety

### A COMPLETE SOLUTION + IOT & AI EXPERTS WITH YOU
Award winning technology with Wapice experts

- Modern application design tools with mobile IoT development
- Integrating into your existing ecosystems
- Deploy and store secure data anywhere in cloud or on-premise
- Wapice experts helping you to succeed and reach the next level

## Why our customers have chosen IoT-TICKET®

- Market ready IoT & AI applications and services stunningly fast
- Instant ramp-up with integration into existing ecosystems
- Visual, informative and interactive apps with dynamic reports and real-time alarms
- Clear, scalable, transparent and predictive pricing model with customer onboarding
- Ability to design the apps and services with own brand and make it look totally yours
- Secure platform where security is priority from harware to cloud
- Following important KPIs on the go with mobile devices

SCHAEFFLER · RAMBOLL · VAHANEN
HELEN · Danfoss · KESLA · EPEC
PEAB · LOIMUA · SARLIN · UPM
Granlund · MOVAX · Junttan

# These are all **out of the box**

## Integrate & get big-data from existing **ecosystems**

No need for cost demanding and time consuming software integration projects. IoT-TICKET® speaks natively the language of machines. Ramping up an IoT & AI project is just a decision to do it.
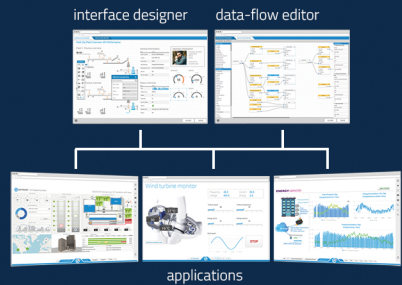

## **Security** as a priority from hardware to cloud

You can trust your data is used and seen only by them who has the access. The security and privacy is built-in and embedded in our solutions. Our networks, hosts, hardware and software are designed by security first, having ISO 27001 information security certification.

## Make it truly yours with **branding**

Design the apps and solutions to express your brand, your services and your company. Show your colors, themes and logos to make it truly yours. And don't forget the cool name for it!

## Design interactive & visual **applications**

Anyone is able to create IoT and AI applications in minutes without a single line of code or without a team of sofware experts, just using interface designer's drag and drop elements and easy to use data-flow editor. All of these out of the box, also for tablets and mobile devices.

## Never miss a thing with **automated & dynamic reports**

Bring together all the insights of your data - tailored for all different needs from technical experts to top management.

## **Real-time alarms & events** ensures right actions on right time

Automated and real-time alarms and events to spot changes that require immediate actions.

## Let our IoT & AI **experts do it for you**

Have a need for IoT or AI but not enough time or resources to get it done? IoT-TICKET® experts are available from consulting to creating the market ready solution and services. We are here for you!
